Email: Sherry.Bucholz@providence.org

All Radiology Residency programs are eligible to participate in the [Electronic Residency Application Service \(ERAS\)](#). This innovative service uses the Internet to transmit residency applications. We are participating in ERAS and only accept applications through this system. Contact your Dean's office for instructions to apply, unless you are an International Medical Graduate.

Our training program requires the following application materials:

- ERAS common application form
- A personal statement
- A Dean's letter
- Three letters of recommendation
- Official medical school transcript
- An official ECFMG certificate (if you graduated from medical school outside of the United States or Canada)
- USMLE parts 1 & 2 (CK & CS), although we accept COMLEX Part 1 & 2 for osteopathic students applying to our program, we require all students to submit USMLE scores.

Personal interviews are by invitation only, and are based on the applicant's academic performance, letters of recommendation and other accomplishments as detailed in the application form. Applicants will be notified by email or letter if selected for interview. Interview days are Monday through Friday.

Interview Dates

2011-2012 positions:

- November 1, 2011 – January 31, 2012
- **Deadline for application is November 1, 2011**

International Applicants

International medical graduates must contact the [Educational Commission for Foreign Medical Graduates \(ECFMG\)](#) for application materials and eligibility requirements. Paper applications will not be accepted. We will accept ERAS applications from International Medical Graduates only if they meet the following criteria:

- Documentation of ECFMG certification; **and**
- Documentation of successful completion of a clinical clerkship or subinternship of at least 8 weeks (hands-on clinical experience where you have been involved in patient care doing Histories & Physicals, ordering and interpreting labs, writing orders, making diagnosis and treatment plans, etc.) performed at a ACGME accredited U.S., Puerto Rican or Canadian medical school; **and**
- Visa status that allows legal entrance into the United States (we do not sponsor or assist with applications for visa).

Although we do not have a minimum board score requirement, applications with a high score will be considered more favorably than those with low scores.
